## Message from the Director

After graduating with an MBA from the US in 2011, I felt a heavy burden over me seeing the few prospective students who could afford to study in North American universities. Studying in most schools in North America is quite an expensive affair compared to many other places in the world. As a result, figuring out how to raise the expected amounts to cover the cost of attendance in these schools can be the most daunting challenge, especially for those without concrete financial muscles. Additionally, what amused me most was the fact that many of those looking for study opportunities in North America didn't know which schools and programs to consider, how to get funding, and how to navigate through the visa processes.

It's because of these challenges that I founded the International Scholars Program to primarily help international students like you. Our goal in this program is to ensure that we provide optimal guidance through the many processes inclined to ultimately attending a North American university and pursuing your master's and offering career guidance and assistance after graduation.

I have received various accolades for my role in founding The International Scholars Program and impacting people's lives.

In **2023**, I was recognized by **African Warrior Magazine** as one of the top 50 Kenyans living in the US.

In **2021**, I received **The Global Impact Award** by the **International Council of Educational Professionals (ICEP)**.

In **2018**, I was recognized by **African Warrior Magazine** as one of the **40 most Inspiring Kenyan Men Living in USA**.

Message from the  
Partner

My professional career spans mentorship, consultancy, board directorship, and program and project leadership across the Telecom, IT, Healthcare, and Development sectors. I've had the privilege of leading transformative initiatives across Africa and the United States, delivering strategic solutions, building cross-sector partnerships, and driving measurable impact.

My academic journey began in Kenya and led me to the United States, where I earned a Bachelor of Science from DeVry University and an MBA from Amberton University. Both degrees were made possible through educational loans, opportunities that not only shaped my career trajectory but also deepened my lifelong commitment to mentorship and equitable access to education.

Throughout my career, from managing complex digital health initiatives in East Africa to leading multimillion-dollar IT and operations programs at global firms such as Ericsson, Vizient, and AT&T, I have seen firsthand the power of education in unlocking leadership, innovation, and social change.

As a former international student and direct beneficiary of financial aid, I understand the unique challenges and the immense promise facing international scholars today. My role as an International Scholars Program Partner is to help scholars navigate these transitions with confidence, provide meaningful mentorship, and reinforce that their investment in education can create transformational outcomes, not only for themselves, but for the communities and systems they will one day lead.

It is an honour, privilege and goal to support the next generation of global changemakers through a program whose mission closely mirrors the one that helped me become who I am today.

## OVERVIEW

Every year, North America absorbs over 1 million international students from every corner of the world who migrate to further their studies. On the other hand, thousands of brilliant students who wish to seek world-class education in North America fail to do so, simply because education in North America is too expensive for them and most have no access to any kind of funding that would facilitate such an endeavor.

The International Scholars Program seeks to help brilliant students from across the globe to achieve that dream of studying in North America regardless of their financial background. We accommodate ambitious, and incredibly talented students who are willing to take a leap of faith in joining the STEM space in order to make their North American graduate dream a reality. One does not need to have a STEM bachelor's degree to pursue STEM designated master's programs.

In essence, The International Scholars Program enables students to navigate through two key challenges that most students face in their quest to study in North America, namely:

- **Acquiring funding**
- **Career support**

### Acquiring Funding

In most countries, save for a few, there are no banks that offer financing for those wishing to study abroad. Through our partnership with major North American-based lenders, we ensure that students under the umbrella of our program get financing to make their study abroad dream in North America a reality.

In addition, the cost of the process of relocating such as visa fees, air tickets, medicals, insurance etc. can also be quite expensive and therefore through this program, we are able to reduce such a financial burden for our members.

Also, we understand that it's quite challenging to find financial aid, and in this program, we negotiate for tuition scholarships/waivers with some of our partner universities and assist our beneficiaries in applying for graduate/teaching assistantships with the schools that we work with. Such financial aid substantially helps cover tuition costs and living expenses for our beneficiaries.

### Career Support

North America is literally the Mecca of high-quality education. With a master's degree from a North American university, you create a competitive profile ripe for the corporate opportunities anywhere across the globe. Besides, blending one's master's program with some of the STEM job skills training that we offer is usually the hallmark of career greatness. These skills are the most sought-after in the contemporary corporate arena.

By packaging you well along those two important realms, we help create your value and make you an ideal candidate for any opportunity for career progression after school. We consistently provide guidance and mentorship at each step of your career ladder to enhance personal growth and success.

## HOW THE PROGRAM WORKS

The International Scholars Program is divided into two options based on the student's academic and financial ability: **REGULAR** and **PRIME**. Students in the **Regular Option** are entitled to **full relocation** expenses funding in addition to **full tuition** and **living expenses** funding while those in **Prime Option** are only entitled to **full tuition** and **living expenses** funding. Funding for tuition and living expenses is acquired from our lending partners. Specific differences between the two options are outlined in the succeeding sections in this handbook.

### QUALIFICATION REQUIREMENTS

**\*\*Note\*\*We DO NOT accept work experience as a substitute for academic qualifications.**

#### Regular Option

To qualify for the regular option, one must have **at least Division 3** equivalent in the **Advanced Level Studies** and at least a **2.8 GPA** in an undergraduate degree in any major. **GMAT/GRE is NOT REQUIRED.**

#### Prime Option

No minimum grade in **Advanced Level Studies** but one has to have at least a **2.8 GPA** in an undergraduate degree in any major. Moreover, under this option, one has to take care of part of their relocation expenses as indicated in subsequent parts of this handbook.

If you qualify and wish to join either option, please follow the steps below.

### ENROLMENT STEPS

#### STEP 1: Joining our study abroad community on telegram

If you are a qualified candidate interested in the program, please join our telegram group of prospective international scholars students using this QR code. <https://t.me/+RJlOjyiPAsc2MGRh>

This telegram group will help you interact with program administrators and other prospective students where you can ask any questions you may have about the program.

## STEP 2: Apply to The Program

Visit [www.internationalscholarsprogram.com](http://www.internationalscholarsprogram.com) and submit your application. Please note there is a non-refundable application fee of **\$20** that is paid at the time of submitting the application. You will receive a decision within 24-48 hours.

## STEP 3: Making Relevant Program Contributions

As part of your acceptance into the program, you will be sent a link via email to make payment for your contribution depending on your chosen option:

- Qualified **REGULAR** students **MUST** pay **USD 1100** as total contribution fees. All payments are made through our online system in two installments of **USD 600** and **USD 500**. A link to make payments will be sent to you once you have been accepted into the program. Please refer to the **Refund Policy** in later pages on financial implications of premature program withdrawal.
- Qualified **PRIME** students **MUST** pay **USD 1600** as total contribution fees. All payments are made through our online system in two installments, **USD 1100** and **USD 500**. A link to make payments will be sent to you once you have been accepted into the program. Please refer to the **Refund Policy** in later pages on financial implications of premature program withdrawal.

## STEP 4: School Admission Advisory

Once you join the program, you will engage our career advisory team for guidance on the schools and programs you can choose based on your academic background and future career goals. We apply to a maximum of three universities that best fit your profile and needs.

## STEP 5: Funding Advisory

Once accepted to a school, our funding team will guide you through the process of applying for tuition and living expenses funding through our lending partners and will also advise you on how to engage our partner universities on applying for any graduate assistantship awards.

The unsecured student loans and graduate assistantship (if any) will enable you to pay for your graduate studies in North America.

### **STEP 6: Visa Application and training**

Once you get approved for funding, our team will guide you on how to request your I-20 or Proof of Acceptance (POA) from the school to seek the student visa.

Upon processing your I-20 or POA, we will guide you through the student visa application process through our intensive visa guidance program to equip you adequately on the expectations of the student visa interview.

### **STEP 7: Travel & Logistics Advisory**

Once your visa is approved, we will start the process of relocating you to North America. At the time of relocation, the program will charge as unsecured loan, all the expenses you will have incurred through the process. You will start repaying 6 months after relocation for a period of 2 years. Additionally, your student loans covering tuition & living expenses will be directly disbursed to you by our lending partners once you report to school. Repayment for the tuition & living expenses loans will begin 6 months after graduation for a period of 6-10 years depending on the lender.

### **STEP 9: Career Support**

Once you relocate and join university, we offer you career support through our STEM job skills training as you pursue your master's degree. These skill sets are geared towards equipping you with the right competencies after graduation and make your profile impressive and ripe for many amazing opportunities in the corporate world not just in North America but everywhere across the world.

## Withdrawal, Late Payment & Refund Policy

- To enroll into this program, students are required to make their 2 instalments contributions using our online system and must complete their payments within 30 days of joining the program.
- Once an application to join the program is approved, the applicant must enroll by making the relevant program contribution within three (3) months.
- If the applicant fails to enroll within this period, the application will expire.
- To be considered for admission again, the individual must submit a new application.
- If a student fails to pay any required installment within one (1) month of the due date, a late payment penalty of \$30 will be applied to their account.
- If a student fails to clear all their installment payments within six (6) months after enrollment, they will be automatically withdrawn from the program.
- To rejoin the program in the future, the individual must submit a new application.
- The program will full cover relocation expenses to the tune of up to \$ **5000** for qualified Regular option students. (Please see page 10)
- The program will **ONLY** cover part of the relocation expenses for prime option students. (Please see page 10)
- The interest charged on the relocation expenses loan will be 1% per month (12% p.a) **flat rate**.
- The interest charges on the tuition and living expenses loan will depend on the originating lender. Interest varies between 9%-15%.
- The regular option students will start repaying the relocation loan 6 months after the disbursement. The loan repayment period is 24 months.
- The students will start repaying the tuition and living expenses loan, 6 months after graduation for 6-10 years depending on the lender.
- As a **REGULAR option** student, the non-refundable total contribution amount is **\$600 (Initial program consultation plus registration fees)**. The remaining **\$500** is **ONLY** refundable if you withdraw within **6 months** of enrolling into the program.

- As a **PRIME option** student, the non-refundable total contribution amount is **\$1100 (Initial program consultation plus registration fees)**. The remaining **\$500** is **ONLY** refundable if you withdraw **within 6** months of enrolling into the program.

**NOTE:** Refunds are processed within 4 months after a withdrawal request is submitted through our system and shall be subject to deduction of any other expenses incurred apart from initial program consultation fees plus registration fees. Refunds will be paid out to your card that you used to make payments to the program. Card refunds are subject to a 5% refund processing fee.

## PROGRAM CONTRIBUTIONS

### REGULAR OPTION CONTRIBUTION & FUNDING AVAILABLE

CONTRIBUTION AMOUNT	1 <sup>ST</sup> INSTALMENT	2 <sup>ND</sup> INSTALLMENT IN 30 DAYS	RELOCATION LOAN AMOUNT	TUITION & LIVING EXPENSES LOAN
\$1,100	\$600	\$500	Up to \$5,000	Up to \$100,000

The relocation loan caters for relocation expenses, such as School Applications, Air ticket, Visa fees, GMAT/GRE fees, SEVIS Fees, Immunizations, initial Rent and Lease Deposits etc, as per the relocation budget in subsequent pages of this handbook.

### PRIME OPTION CONTRIBUTION & FUNDING AVAILABLE

CONTRIBUTION AMOUNT	1 <sup>ST</sup> INSTALMENT	2 <sup>ND</sup> INSTALLMENT IN 30 DAYS	RELOCATION LOAN AMOUNT	TUITION & LIVING EXPENSES LOAN
\$1,600	\$1100	\$500	\$N/A	up to \$100,000

In addition to the above contribution, prime option students take care of some of their relocation expenses. These expenses are not required to be pre-paid upfront but rather as incurred. These relocation expenses include Air ticket, first month rent & lease deposits, Health insurance, Medicals etc. The program will cover at most 3 school applications, Visa fees, and the SEVIS fee, if a student scores 70% and above in the visa preparation mock sessions.

## FUNDING OPTIONS AVAILABLE

Our Programs are grouped in four funding TIERS. The options available are as follows:

### TIER 1: FULLY FUNDED

Programs in this TIER receive **full funding**. These programs include:

- Computer Science
- Artificial Intelligence
- Data Science
- Mathematics
- Medicine/Nursing/Pharmacy

### TIER 2: FULLY FUNDED

Programs in this TIER also receive **full funding**. These programs include:

- Engineering programs
- Data Analytics
- Business Analytics

### TIER 3: PARTIAL/FULL FUNDED

Programs in this TIER get **partial or full funding** but may require students to provide proof of additional funding sources. These programs include:

- Accounting
- Economics
- Finance
- MBA
- Science

### TIER 4: SECURED FINANCING

Students applying for programs in this TIER receive **full SECURED financing**. In the absence of secured financing, one may finance their studies through one of the following options:

1. **A personal or family** (from parents or siblings) **bank statement** showing enough money to cover the first year's tuition and living costs.
2. **Scholarship/Sponsorship**

## SUMMARY OF UNIVERSITIES IN THE PROGRAM

We currently work with a select number of universities that offer STEM designated programs. STEM programs provide up to 3 years of optional practical training (OPT) after graduation, while non-STEM programs provide 1 year OPT.

All the beneficiaries of the program are enrolled at any of the following universities.

1. **Indiana University of Pennsylvania (IUP) – (OFFICIAL PARTNER)**
2. **Missouri State University – (OFFICIAL PARTNER)**
3. **University of Kentucky (UK)- (OFFICIAL PARTNER)**
4. **University of Louisville (UofL)- (OFFICIAL PARTNER)**

## WHAT OUR BENEFICIARIES HAVE TO SAY

**Kelvin Ongaga**

**Illinois State University (ISU)**

"The Program gives the sons and daughters of the hoi polloi a chance in life. Being part of the program has impacted me positively. I cannot wait to see how the coming years pan out."

**Wilfred Mwiti**

**The University of Alabama in Huntsville (UAH)**

"I am honored to be one of the first beneficiaries of the Program. I sincerely thank the program for assisting me throughout my journey and for offering me a job after graduation. I cannot thank you enough. I want to give my best in my role as the program manager to make sure that those coming through the program succeed like I did."

**Jackson Omushien**

**Illinois State University (ISU)**

"I had been struggling to find admission and moving abroad for close to four years but upon joining the Program, it took less than 6 months after my second GMAT exam. I completed my undergrad in 2015 and now I have managed to get a scholarship towards my graduate studies in Applied Economics (A STEM Program with an amalgamation of IT courses). It was a swift process which made me get accepted to all the schools I applied. Furthermore, there is visa coaching that tremendously increases one's probability of getting a visa (more than 85% visa approval rating). Thanks to the team for the assist even after landing in America

**Elosy Kithinji**

**Illinois State University (ISU)**

"Being part of the Program has been the most rewarding experience ever! They've held my hand since the first day I moved to the US till now (1 year later). They've continuously supported, advised, guided and walked with me in the pursuit of my American dream, without which I wouldn't be where I am today."

**Janet Mwangi**

**Grand Valley State University**

"The process is smooth and straightforward, but you need to do your part too as a student. Bob goes out of his way to ensure you get what you signed up for - and more. I would recommend the Program for their professionalism and excellent services! It is a hidden gem; I hope more people realize this and take advantage of the opportunity to advance their careers in IT and ultimately improve their lives."

**Alex Gichuki**

**Grand Valley State University**

"Not only do they help you with your school application process but also prepare you for the visa interview to increase your chances of approval. I am forever grateful for the overwhelming support that I received through the Program. I would highly recommend The International Scholars Program anytime, all the time, to international students like me who wish to study IT related programs in the USA."
